

SSEP Mission 17 to ISS: Orbiter Experiments Flying on SpaceX-29 Payload Summary

Contact: Dr. Jeff Goldstein, SSEP National Program Director, 301-395-0770, jeffgoldstein@ncesse.org

	Community	Experiment	Team	Grades	At Launch
1	Edmonton, Alberta, Canada	The Effects of Microgravity on the Statoliths and Statocyst Cells in <i>Lepidium</i> sativum (Garden Cress)	2 Co-Principal Investigators, 2 Co- Investigators	9	Х
2	Ukraine	Effect of Humic Substances on the Growth and Metabolism of Yeasts in Microgravity	1 Principal Investigator, 3 Co- Investigators	8-10	
3	Ukraine	Influence of Microgravity and G-force on Diffusion in Metals	1 Principal Investigator, 2 Co- Investigators, 1 Collaborator	9	
4	Phoenix, Arizona	Red Desiree Potato and Sweet Potato	3 Co-Principal Investigators	5	
5	Glendora, California	Mushroom Leather Proposal	2 Co-Principal Investigators, 1 Investigator, 1 Collaborator	11-12	
6	Moreno Valley, California	The Strength of Concrete with Eggshells as Filler in Microgravity	2 Co-Principal Investigators, 1 Investigator, 1 Collaborator	11	

38 Experiments from the SSEP Mission 17 to ISS Orbiter Payload Flying on SpaceX-29 (one experiment flying on later mission)

7	Hillsborough County, Florida	The Microgreen of the Future: Amaranthus tricolor	2 Co-Principal Investigators, 4 Co- Investigators	6-8	Х
8	Hillsborough County, Florida	The changes of nutritional and germination values of Sesame microgreens in microgravity	2 Co-Principal Investigators	7-8	Х
9	Ocala, Florida	Does Microgravity Affect Protein Production of Escherichia coli?	1 Principal Investigator	5	Х
10	Osprey, Florida	The ability of microalga, <i>Chlorella vulgaris,</i> to remove nitrogen and phosphorous from wastewater in microgravity	4 Co-Principal Investigators	7	Х
11	Viera, Florida	<i>E-coli</i> and endotoxin detection in microgravity via LAL-Horseshoe crab blood testing	1 Principal Investigator, 4 Co- Investigators	7	Х
12	Jonesboro, Georgia	Germination of Mentha spicata in microgravity	1 Principal Investigator, 2 Co- Investigators		
13	Grayslake, Illinois (Note: experiment flying on later mission)	The Effects of Microgravity on Cholesterol Lowering Activity by Lactobacillus acidophilus	1 Principal Investigator	14	
14	Lake Charles, Louisiana	Growth of Spirulina in Microgravity	1 Principal Investigator	8	Х
15	University System of Maryland, Maryland	The Effect of Microgravity on Telomerase Activity and Efficiency in <i>Saccharomyces cerevisiae</i>	5 Co-Principal Investigators	16	
16	Westland, Michigan	Mushroom Germination in Microgravity	2 Co-Principal Investigators, 4 Co- Investigators	5	Х
17	Edina, Minnesota	Bean Root Growth in Microgravity	3 Co-Principal Investigators	10 and 12	Х

18	Las Vegas, Nevada	Wolffia in Microgravity	1 Principal Investigator, 3 Co- Investigators	8	Х
19	Camden New Jersey	Mold Growth in Microgravity: A evaluation on the spread of fungi in microgravity conditions	3 Co-Principal Investigators	5	Х
20	Springfield, New Jersey	The Effect of Microgravity on Gray Mold	5 Co-Principal Investigators	7	
21	Albany, New York	The effects of microgravity on <i>Oryza sativa</i> (rice)	5 Co-Principal Investigators	8	
22	Brooklyn, New York - BSEA	The effects of microgravity on the germination of radish seeds	2 Co-Principal Investigators	6	
23	Buffalo/Niagara, New York	The Effect of Microgravity on the Germination of Chamomile Seeds	2 Co-Principal Investigators, 2 Co- Investigators	5	
24	Garden City, New York	Effects of Microgravity on Dill Seed Germination	4 Co-Principal Investigators	7	Х
25	Long Beach, New York	How Does Microgravity Affect the Germination of Oyster Mushroom Spawns (<i>Pleurotus Ostreatus</i>)?	1 Principal Investigator, 1 Investigator, 3 Collaborators	6	
26	Lynbrook, New York	How do microgravity and space conditions affect the growth of the wine cap mushroom, <i>Stropharia rugosoannulata</i> , mycelium?	2 Co-Principal Investigators, 1 Collaborator	9	Х
27	Norwood, New York	The Effects of Microgravity on the Reproduction Cycle of <i>Drosophila melanogaster</i> (Common Fruit Fly)	2 Co-Principal Investigators	10 and 12	Х
28	Red Hook, New York	Examining Artemia salina Hatching in the Presence of Microgravity	5 Co-Principal Investigators	12	

		Develope Queryth in Microsomersity		0	V
29	Pickerington, Ohio	Bamboo Growth in Microgravity	2 Co-Principal Investigators	6	X
30	Gervais, Oregon	Patulin Growth in Space	4 Co-Principal Investigators	11-12	
31	Erie, Pennsylvania	The Effect of Microgravity on Crystal Growth	5 Co-Principal Investigators	7-8	
32	Pittsburgh, Pennsylvania – CCAC	The effect(s) of microgravity on the dormant state of cancer cells	2 Co-Principal Investigators	13	Х
33	Bandera, Texas	The Effects of Microgravity on Basil Germination	3 Co-Principal Investigators	7	
34	Burleson, Texas	Can a Cotton Ball Instead of Soil Germinate a Lavender Seed in Microgravity?	4 Co-Principal Investigators	6	
35	Ector County, Texas	Pestalotiopsis microspora in Microgravity	2 Co-Principal Investigators, 1 Investigator, 2 Collaborators	10-11	Х
36	McKinney, Texas	Does microgravity affect the formation of symbiotic relationships between soy and Rhizobium?	2 Co-Principal Investigators	13 and 16	Х
37	Texarkana, Texas	Do Tardigrades Develop Properly in Microgravity?	1 Principal Investigator, 2 Co- Investigators	7	Х
38	Renton, Washington	Microgreen Growth in Microgravity Environment	1 Principal Investigator, 2 Co- Investigators, 1 Collaborator	8	
39	iForward-Grantsburg, Wisconsin	Does microgravity affect the germination of <i>pleurotus ostreatus</i> spores?	5 Co-Principal Investigators	9	

The Student Spaceflight Experiments Program (SSEP) is a program of the National Center for Earth and Space Science Education (NCESSE) in the U.S. and the Arthur C. Clarke Institute for Space Education internationally. It is enabled through a strategic partnership with Nanoracks, LLC, which is working with NASA under a Space Act Agreement as part of the utilization of the International Space Station as a National Laboratory. SSEP is the first pre- college STEM education program that is both a U.S. national initiative and implemented as an on-orbit commercial space venture.
